

More Space. Better Organization. Greater Efficiency.

No ingress of dirt

No ingress of dirt

Pipe racks bring order to job sites and storage yards. They free up space and give you clear oversight of your pipe and drill rod inventory.

Crane handling is quick and safe. Pipes and rods stay clean and within easy reach. The racks meet certified safety standards and help keep your crews safe.

- Drill rods, 90 mm diameter × 2.0 m lengths:
50 pieces
- Casing, 152.4 mm diameter × 2.0 m lengths:
15 pieces (max. 19)
- Casing, 159 mm diameter × 2.0 m lengths:
15 pieces. (max. 18)
- Maximum load capacity:
2 t

- **Rugged and Durable**
The heavy-duty hot-dip galvanized steel construction is built for daily use on job sites and in storage yards.
- **Space-Saving Stacking**
Five or more pipe racks stack neatly to make the most of your available space.
- **Safe and Organized**
Keeping materials off the ground improves organization and reduces tripping hazards. Pipes and rods stay free of dirt, so there is no tedious cleanup.
- **Efficient Handling**
Pipes and drill rods stay organized, clean, and within easy reach. Saves time and labor.
- **Easy to Transport**
Ideal for crane or forklift handling, and for moving between job sites. *geragert, spart Zeit und Aufwand.*
